Technology and Globalization: A Study of Role of Technology in the Enhancement of the Globalization

–*Md Moniruddin Sk & Ajahar Islam*

Abstract

(Admittedly technology plays a key role in enhancement of globalization in global perspective. It is realized how the information technology has changed the entire world and ultimately made the entire world a village. In fact, information technology has broadly contributed to the enhancement of globalization and made it dynamic. It is also to be noted that Information Technology, revolution in computer and digital technology have changed greatly since their first step. Information Technology has been enriched by android mobile and social media. In this context, we can say that the information technology revolution has changed the concept of globalization and revolutionized one and all on this earth. Even those who are living in far off villages and do not have access to towns and cities have been experiencing various kinds of social change in their day to day life as technology has enhanced globalization and its various effects all over the world. In this paper, therefore, there is a brief discussion of the role of technology in enhancement of globalization over the world.)

Key words: technology, transportations, globalization, Global Village, collaboration

1. Introduction

The technology has been a boon to the humanity. Before the initiation of technology, people would live in small groups. They could not communicate with the people residing in the distant groups. With the passage of time, the various groups clustered and gave birth to different nations. The Nations would live as if in cocoons. With the initiation of technology, the distance has become near and the world has become a global village. In the recent century, the advanced technologies have made people global citizens. The inventions of science and technology have accelerated the communications so easy that we feel that we live in a big village. The inventions in the transportations, information technology, media technology, educational technology, Medicine technology and the like have geared the globalization. This paper seeks to establish the application of different technologies in causing globalization.

2. What is Technology?

Technology which means 'science of craft' is the sum of techniques, skills, methods and processes used in a production
