

**VALUE ADDED COURSE ON**  
**ADVANCED SPATIAL STATISTICAL TECHNIQUES**

**Report**

**Name of the course:** Advanced spatial statistical techniques

**Course Coordinator:** Dr. Sk Mithun

**Duration:** 10<sup>th</sup> March, 2022 to 9<sup>th</sup> May, 2022 Monday to Friday 5 Pm To 6 Pm

**Resource person:**

1. Dr. Pijush Kanti Tripathi, Haldia Government College
- 2., Prof. Sarbeswar Haldar, Haldia Government College
3. Dr. Sk. Mithun, Haldia Government College
4. Prof. Gopal Chandra Hembram, Haldia Government College

MODULE	CONTENT	HOURS
1	<b>Probability Theory:</b> Probability density functions with respect to Normal, Binominal and their geographical application.	6
2	<b>Multivariate Analysis:</b> Multiple and Partial correlation, Multi-variate regression equation, 2nd degree polynomial curve fitting	6
3	<b>Sampling:</b> Sampling plans for spatial and non-spatial data, sampling distributions, Sampling estimates for large and small sampling tests involving means and proportions.	6
4	<b>Analysis of Variance:</b> Objectives, One Way and Two Way Analysis of Variance	6
5	<b>Hypothesis Testing:</b> Formulation and Rejection rule, One and two tailed test, level of significance, degree of freedom, type-I and II errors, t-test, Chi-square test.	6

**Objectives:** The main objective of this course is to provide theoretical knowledge of the advanced statistical techniques and application of these techniques in the field of geographical research.

**No of participants:** 51 students of U.G. 4<sup>th</sup> semester

**Course outcome:** After completion of this course the participants will be able to apply advanced spatial statistical techniques in the diverse field of geographical research.

VALUE ADDED COURSE

## ADVANCED SPATIAL STATISTICAL TECHNIQUES

Post Graduate Department of  
Geography  
Haldia Government College

Time Scheduled: 10<sup>th</sup> March, 2022 to 09<sup>th</sup> May,  
2022 (Monday to Friday, 5P.M. to 6P.M.)

**Course Duration: 30 hours**

**Course Coordinator:**  
**Dr. Sk Mithun**  
Assistant Professor  
Department Of Geography

**Last date of Enrollment: 7<sup>th</sup> March, 2022**

### About the Course:

The Post Graduate department of Geography is going to organize this value added course considering the absolute need of the advanced spatial statistical techniques in the field of geographical research. This course will definitely help the students in future. The main purpose of this course is to improve the theoretical knowledge of advanced statistical techniques and the application of these techniques.

### Objectives:

The main objective of this course is to provide theoretical knowledge of the advanced statistical techniques and application of these techniques in the field of geographical research.

### Course Outcome:

After completion of this course the participants will be able to apply advanced spatial statistical techniques in the diverse field of geographical research.

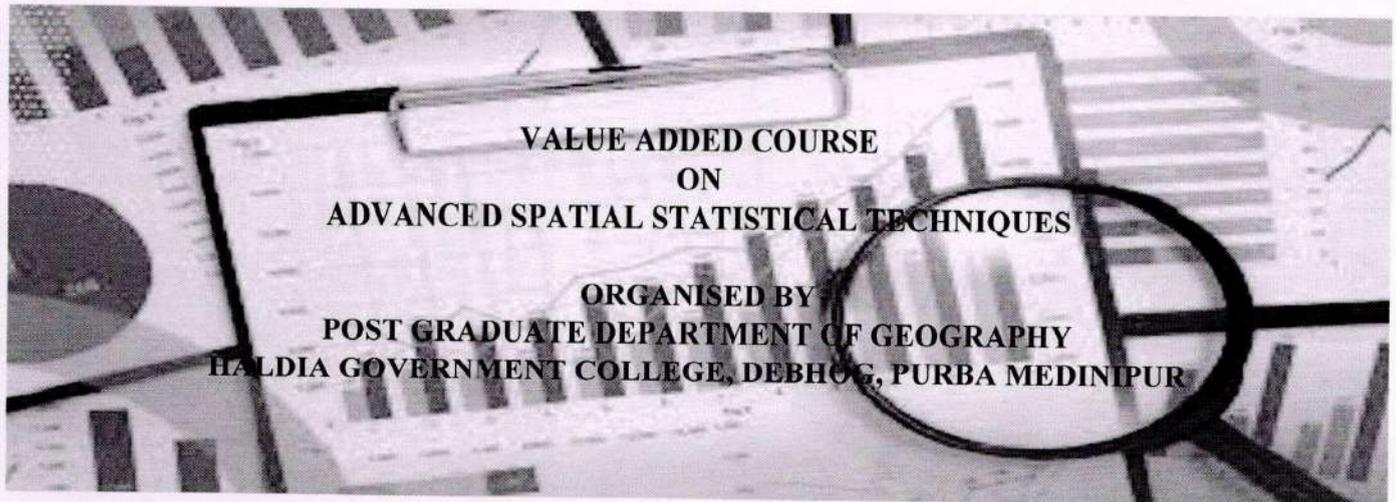

**Certificate after completion of the course**

**Registration Details: Registration is mandatory for all the participants. There is no registration fee for the course.**

**Eligibility: Undergraduate Student of Geography**

### Resource Persons:

1. Dr. Pritish Kanti Tripathi  
Haldia Government College
2. Mr. Sarbeswar Halder  
Haldia Government College
3. Dr. Sk Mithun  
Haldia Government College
4. Gopinath Kumar Heratharam  
Haldia Government College

VALUE ADDED COURSE  
ON  
ADVANCED SPATIAL STATISTICAL TECHNIQUES

ORGANISED BY  
POST GRADUATE DEPARTMENT OF GEOGRAPHY  
HALDIA GOVERNMENT COLLEGE, DEBHOG, PURBA MEDINIPUR

COURSE CONTENTS

Module-1

6Hrs

**Probability Theory:** Probability density functions with respect to Normal, Binominal and their geographical application.

Module-2

6Hrs

**Multivariate Analysis:** Multiple and Partial correlation, Multi variate regression equation, 2<sup>nd</sup> degree polynomial curve fitting

Module-3

6Hrs

**Sampling:** Sampling plans for spatial and non-spatial data, sampling distributions, Sampling estimates for large and small sampling tests involving means and proportions.

Module-4

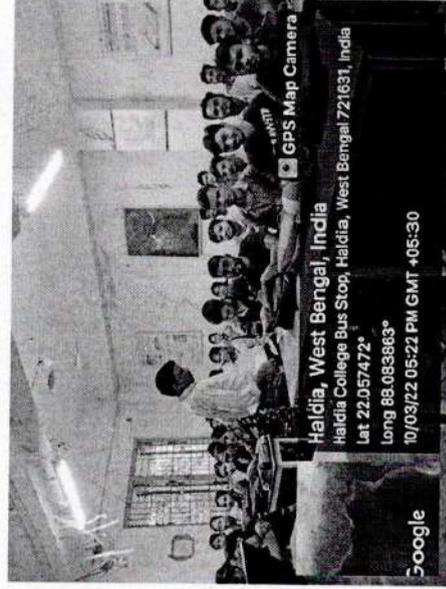

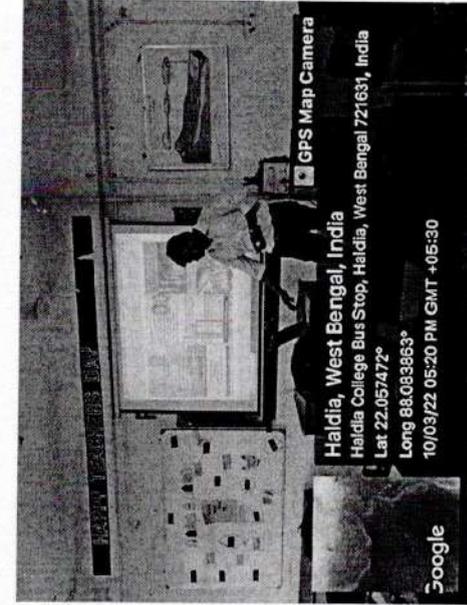

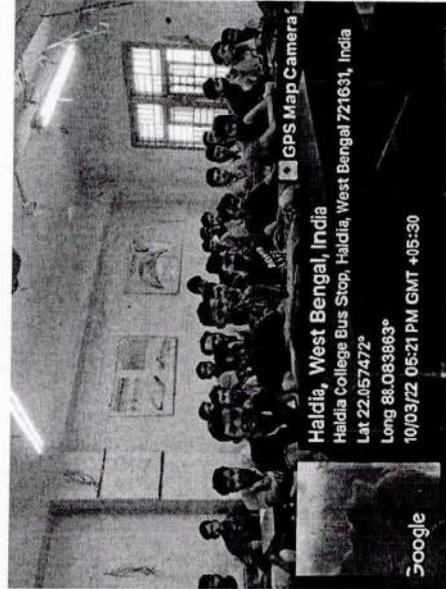

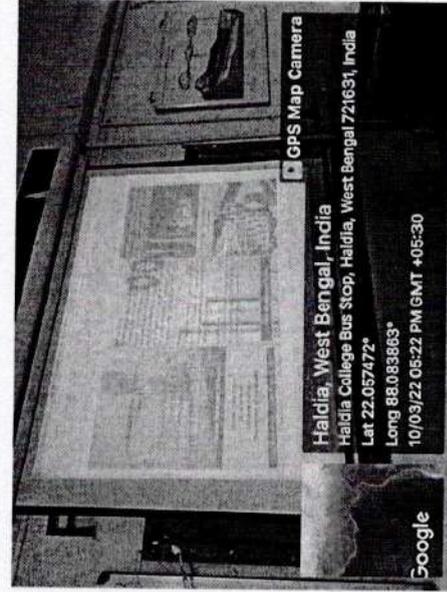

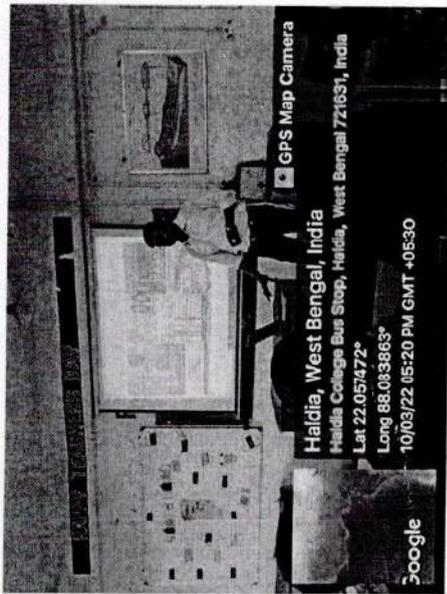

6Hrs

**Analysis of Variance:** Objectives, One Way and Two Way Analysis of Variance

Module-5

6Hrs

**Hypothesis Testing:** Formulation and Rejection rule, One and two tailed test, level of significance, degree of freedom, type-I and II errors, t-test, Chi-square test.

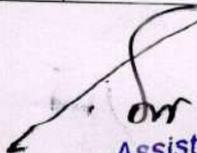

**Add-on/ Value Added Course**  
**On**  
**ADVANCED SPATIAL STATISTICAL TECHNIQUES**

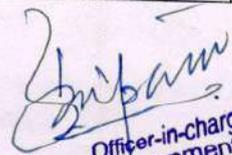

**Organized by:**  
Department of Geography

VALUE ADDED COURSE ON  
ADVANCED SPATIAL STATISTICAL TECHNIQUES  
(10<sup>th</sup> March, 2022 to 09<sup>th</sup> May, 2022)

Invigilator's signature

V.U. Registration no. with year: 1160524 (2020-21)

Semester: 4<sup>th</sup> Department: Geography Date: 06.5.2022

Full marks: 20

Time: 30 mins.

**Instruction:**

- Each question contains 1 mark.
- All questions are mandatory.
- Put a tick mark (✓) for the correct option.

1. A numerical value used as a summary measure for a sample, such as a sample mean, is known as a
  - A. Population Parameter
  - B. Sample Parameter
  - ✓ C. Sample Statistic
  - D. Population Mean
2. If the value of chi-square calculated is higher than the value of chi-square critical, what step a statistician should take?
  - ✓ A. Reject null hypothesis
  - B. Fail to reject null hypothesis
  - C. Choose a different sample which has lower chi-square value
  - D. None of the above
3. A random sample of size 225 is drawn from the population of mean  $\mu$  and standard deviation  $\sigma$ . The sample mean follows the distribution with mean 100 and standard distribution  $4/3$ . The value of  $\mu$  and  $\sigma$  are:
  - A. (100, 18)
  - B. (100, 15)
  - C. (100, 24)
  - ✓ D. (100, 20)
4. According to Gaussian statistical analysis, if the confidence level is 0.10, then the values lying outside the confidence level is
  - A. 1 in 5
  - ✓ B. 9 in 10
  - C. 1 in 10
  - D. 8 in 10
5. Which among the following are the measures of Central Tendency or Measures of Location? A. Mean, B. Range, C. Mode, D. Median, and E. Variance Choose the most appropriate answer from the options given below:
  - A. A, B, and C only
  - B. C, D and E only
  - ✓ C. A, C and D only

D. B, C and D only

6. If two regression coefficients are 0.8 and 1.2, which one of the following is the value of coefficient of correlation?

- A. 0.97
- B. 0.96
- C. 1.00
- D. 0.80

7.  $E(X) = \lambda$  is used for which distribution?

- A. Binomial distribution
- B. Poisson's distribution
- C. Bernoulli's distribution
- D. Laplace distribution

8. Find the variance in a Binomial Distribution, if  $x$ ,  $y$ , and  $z$  are the probability of getting success, failure, and a number of trials, respectively.

- A.  $xyz$
- B.  $x^2yz$
- C.  $xy^2z$
- D.  $x^2y^2z^2$

9. If the mean of a frequency distribution is 100 and the coefficient of variation is 45%, then what is the value of the variance?

- A. 2025
- B. 450
- C. 45
- D. 4.5

10. Failing to reject the null hypothesis when it is false is:

- A. alpha
- B. Type I error
- C. beta d.
- D. Type II error

11. Given IQ scores are approximately normally distributed with a mean of 100 and standard deviation of 15, the proportion of people with IQs above 130 is:

- A. 95%
- B. 68%
- C. 5%
- D. 2.5%

12. A parameter is:

- A. a sample characteristic
- B. a population characteristic
- C. unknown
- D. normal normally distributed

13. Which one of these statistics is unaffected by outliers?

- A. Mean
- B. Interquartile range
- C. Standard deviation
- D. Range

14. When asked questions concerning personal hygiene, people commonly lie. This is an example of:

- A. sampling bias
- B. confounding
- C. non-response bias
- D. response bias

15. When the correlation coefficient,  $r$ , is close to one:

- A. there is no relationship between the two variables
- B. there is a strong linear relationship between the two variables
- C. it is impossible to tell if there is a relationship between the two variables
- D. the slope of the regression line will be close to one

16. Which of the following is not a parametric test:

- A. F-test
- B. t-test
- C. Chi-square test
- D. Z-test

17. The intercept in linear regression represents:

- A. the strength of the relationship between  $x$  and  $y$
- B. the expected  $x$  value when  $y$  is zero
- C. the expected  $y$  value when  $x$  is zero
- D. a population parameter

18. The relationship between the measure of central tendency- mean, median and mode for a moderately skewed distribution is given as:

- A. mode = 3 median - 2 mean
- B. mode = median - 2 mean
- C. mode = 2 median - 3 mean
- D. mode = median - mean

19. One use of a regression line is:

- A. to determine if any  $x$ -values are outliers.
- B. to determine if any  $y$ -values are outliers.
- C. to determine if a change in  $x$  causes a change in  $y$ .
- D. to estimate the change in  $y$  for a one-unit change in  $x$ .

20. What is the effect of an outlier on the value of a correlation coefficient?

- A. An outlier will always decrease a correlation coefficient.
- B. An outlier will always increase a correlation coefficient.
- C. An outlier might either decrease or increase a correlation coefficient, depending on where it is in relation to the other points.
- D. An outlier will have no effect on a correlation coefficient.
